

EUROPHYSICS JOURNAL

ADVANCES IN PHYSICS

VOLUME 26 1977

Editor

Professor D. H. Martin, B.Sc., Ph.D., F.Inst.P.

Editorial Board

Sir Nevill Mott, B. R. Coles, P. W. Anderson

P. Fulde, E. W. J. Mitchell, P. Nozières

C. Rizzuto, M. J. Seaton, A. Zawadowski

Published by

Taylor & Francis Ltd

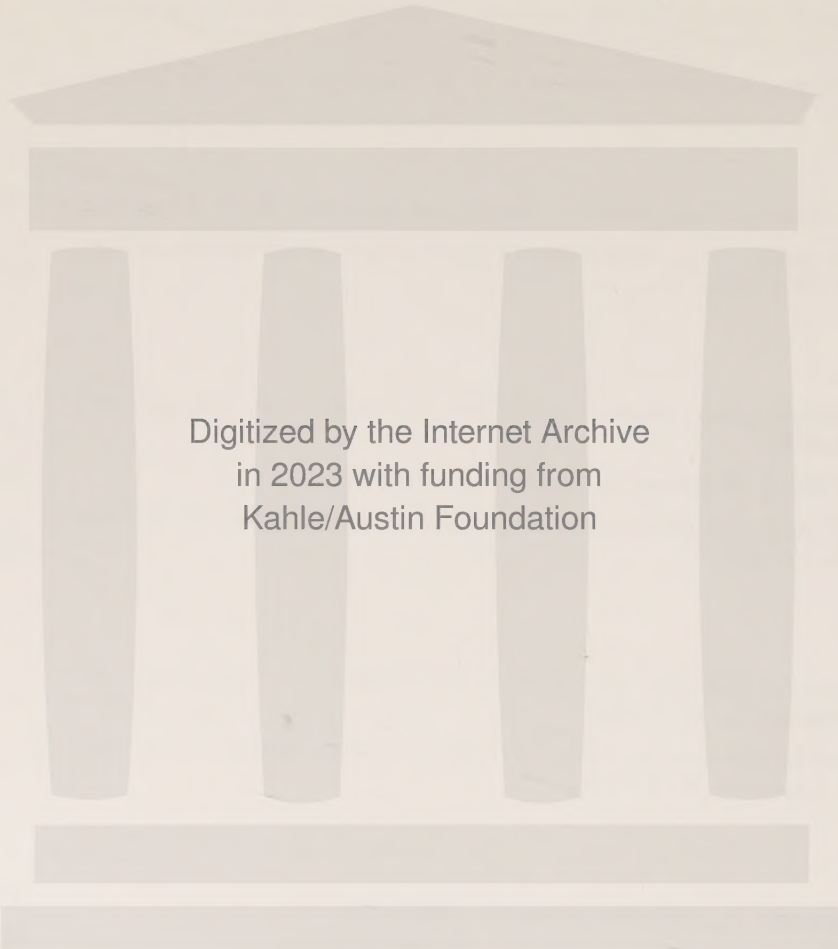

10-14 Macklin Street, London WC2B 5NF

CONTENTS

Articles published in Volumes 21-25	Page i-iii
Recombination-enhanced defect reactions. Strong new evidence for an old concept in semiconductors. P. J. DEAN and W. J. CHOYKE	1
Light absorption in antiferromagnets. V. V. EREMENKO and E. G. PETROV	31
The use of synthetic membranes in biophysical research. R. H. TREDGOLD	79
Interstellar grains. The interaction of light with a small-particle system. D. R. HUFFMAN	129
Charge perturbations around impurities in metals. G. GRÜNER and M. MINIER	231
Scattering theory of defects in crystals. R. RENNIE	285
Vibrational properties of elemental amorphous semiconductors. D. BEEMAN and R. ALBEN	339
Silicon dioxide and the chalcogenide semiconductors; similarities and differences. N. F. MOTT	363
Spin susceptibilities and the theory of itinerant-electron antiferromagnetism. N. A. CADE and W. YOUNG	393
Metamagnetism. E. STRYJEWSKI and N. GIORDANO	487
Electronic structure of Mott insulators. B. H. BRANDOW	651
Editorial: Professor Sir Nevill Mott, Nobel Laureate, 1977	809
Doped amorphous semiconductors. W. E. SPEAR	811
Band structure of transition metal compounds. J.-L. CALAIS	847
Triboluminescence. A. J. WALTON	887

Kahle/Austin Foundation

CONTENTS OF VOLS. 21-25

VOLUME 21

	Page
Some crystalline field effects in metals. PETER FULDE and INGO PESCHEL	1
Multiple scattering theory in condensed materials. P. LLOYD and P. V. SMITH	69
Systematics of the breakdown of Mott insulation in binary transition metal compounds. J. A. WILSON	143
Flux vortices and transport currents in type II superconductors. A. M. CAMPBELL and J. E. EVETTS	199
Erratum	429
Deviations from Matthiessen's rule. JACK BASS	431
A theory of localized electronic breakdown in insulating films. N. KLEIN	605
A.c. loss and related effects in type II superconductors. P. H. MELVILLE	647
Erratum	691
Dynamics of order-disorder-type ferroelectrics and anti-ferroelectrics. R. BLINC and B. ŽEKŠ	693
Theory of E.P.R. of 3d impurities in metals. L. L. HIRST	759
Errata and addenda	783
The metal-insulator transition in extrinsic semiconductors. N. F. MOTT	785
Optimum atomic orbitals for molecular calculations. A review. F. R. BURDEN and R. M. WILSON	825

VOLUME 22

The structure of molecular liquids by neutron scattering. J. G. POWLES	1
On the existence of free and self-trapped carriers in insulators: an abrupt temperature-dependent conductivity transition. DAVID EMIN	57
The interaction of colour centres and dislocations. C. D. CLARK and J. H. CRAWFORD	117
A model for the metal-to-insulator transition in V_2O_3 . J. ASHKENAZI and M. WEGER	207
Positron studies of condensed matter. R. N. WEST	263
Statistical thermodynamics of the liquid surface. CLIVE A. CROXTON	385
Hyperfine interaction of defects in insulators. B. HENDERSON and A. K. GARRISON	423

	Page
The structural and optical properties of amorphous germanium	
I. A model for the structural and optical properties. W. PAUL, G. A. N. CONNELL and R. J. TEMKIN	531
II. Structural properties. R. J. TEMKIN, W. PAUL and G. A. N. CONNELL	581
III. Optical properties. G. A. N. CONNELL, R. J. TEMKIN and W. PAUL	643
High field superconductivity in thin films. PETER FULDE	667
The study of structural phase transitions by means of ultrasonic experiments. WALTHER REHWALD	721
Green-function method for lattice statics. V. K. TEWARY	757

VOLUME 23

Editorial

Experiments on simple magnetic model systems. L. J. DE JONGH and A. R. MIEDEMA	1
The elastic dielectric. H. C. WONG and J. GRINDLAY	261
Galvanomagnetic effects in anisotropic metals. C. M. HURD	315
Electron transport phenomena in small-gap semiconductors. W. ZAWADZKI	435
Electronic transport and localization in low mobility solids and liquids. W. E. SPEAR	523
On the application of group theory to spinwaves in collinear magnetic structures. V. C. SAHNI and G. VENKATARAMAN	547
Elastic interaction and the phase transition in coherent metal-hydrogen systems. HERBERT WAGNER and HEINZ HORNER	587
Deviations from Matthiessen's rule at low temperatures: An experimental comparison between various metallic alloy systems. M. R. CIMBERLE, G. BOBEL and C. RIZZUTO	639
Group theory in solid-state physics is not dead yet, <i>alias</i> Some recent developments in the use of group theory in solid-state physics. A. P. CRACKNELL	673
Functional integral methods in the theory of the Anderson model. G. MORANDI, E. GALLEANI D'AGLIANO, F. NAPOLI and C. F. RATTO	867
Monte Carlo computer experiments on critical phenomena and metastable states. K. BINDER	917
Experimental evidence for many-body effects in dilute alloys. G. GRÜNER	941

VOLUME 24

Slow-neutron multiple scattering. V. F. SEARS	1
Sloping convection in a rotating fluid. R. HIDE and P. J. MASON	47
Electron crystallization. C. M. CARE and N. H. MARCH	101
Charge-density waves and superlattices in the metallic layered transition metal dichalcogenides. J. A. WILSON, F. J. DI SALVO and S. MAHAJAN	117

	Page
Charged dislocations in ionic crystals. R. W. WHITWORTH	203
Phonon-assisted transition rates. I. Optical-phonon-assisted hopping in solids. DAVID EMIN	305
Optical homodyne detection. E. JAKEMAN, C. J. OLIVER and E. R. PIKE	349
Structural and electrical properties of granular metal films. B. ABELES, PING SHENG, M. D. COUTTS and Y. ARIE	407
Transport properties of electrons in energy band tails. D. REDFIELD	463
Exact formulae for the electrical resistivity. M. HUBERMAN and G. V. CHESTER	489
Magnetic behaviour of cobalt, iron and manganese dissolved in palladium. G. J. NIEUWENHUYNS	515
The optical and electrical effects of high concentrations of defects in irradiated crystalline gallium arsenide. R. COATES and E. W. J. MITCHELL	593
Physical cluster mechanics: statistical thermodynamics and nucleation theory for monatomic systems. M. R. HOARE and P. PAL	645
Erratum	679
Electron spin resonance of magnetic ions in metals. An experimental review. R. H. TAYLOR	681
Interpretation of <i>S</i> -state ion E.P.R. spectra. D. J. NEWMAN and W. URBAN	793

VOLUME 25

Waves and Thom's theorem. M. V. BERRY	1
Quantum theory and molecular structure. R. G. WOOLLEY	27
Electron energy loss studies in solids; The transition metal dichalcogenides. M. G. BELL and W. Y. LIANG	53
Theoretical and experimental studies on one-dimensional magnetic systems. M. STEINER, J. VILLAIN and C. G. WINDSOR	87
The generation of coherent submillimetre waves. D. H. MARTIN and K. MIZUNO	211
Interionic potentials in alkali halides and their use in simulations of the molten salts. M. J. L. SANGSTER and M. DIXON	247
Statistical theory of nucleation, condensation and coagulation. K. BINDER and D. STAUFFER	343
Luminescence in amorphous semiconductors. R. A. STREET	397
The atmospheres of the outer planets. G. E. HUNT	455
The determination of the dynamic structures of atoms and molecules using the (e, 2e) reaction. I. E. MCCARTHY and E. WEIGOLD	489
The use of Langmuir probes in the study of high pressure plasmas. P. R. SMY	517
Electrons in bismuth. V. S. ÉDEL'MAN	555
Ginzburg-Landau theory of phase transitions in pseudo-one-dimensional systems. W. DIETERICH	615
